

Equine Veterinary Services

Recommended Foal Vaccination Schedule

Foals born to mares with proper prefoaling vaccinations:

These vaccines should be done at 7 and 8 months of age:

- 5-way – Eastern/Western Encephalitis, Tetanus, Rhinopneumonitis, Influenza
- West Nile Virus
- Rabies
- Strangles

Foals born to mares of unknown or no vaccination history:

Same vaccines as listed above, but done at 3 and 4 months of age, then a third booster at 10-12 months of age.

Following these vaccinations, weanlings then can go onto an adult vaccination schedule.
